

*GROPERS are one of the 'resident fish' we are looking to protect. We used to have some beautiful big gropers in Greens Pool, but they are now long gone. Its interesting to know that the oldest groper recorded was over 70 years old.*

### **Greens Pool as a Fish Habitat Protected Area?**

**Hi friends, and Friends of Greens Pool,**

After our launch and the articles in the Bulletin (thanks Pat and Andrew) people have come forward wanting to 'be involved'...active....and this is wonderful. Thankyou to everyone who has emailed and offered to help, be involved, write submissions. We have made a very positive start.....

There a lots of ways you can become involved:

- Please help us get the word out about the Mothers and Children gathering at Greens Pool at 11am on September 4th. We need to have a large gathering of mothers and children, as it is these children (and perhaps eventually their children) who will benefit from protecting Greens Pool. I have attached an eflyer to help spread the word.
- Environmental artist Cecile Williams ([www.cecilewilliams.com.au](http://www.cecilewilliams.com.au)) is the set and costume designer for The Musical, and is also doing a large scale outdoor installation **A Towel or Two**. Cecile is asking for donations of old beach towels, lots of them needed, and these can be left in the plastic box just inside the Denmark Arts gates on Strickland Street. Please help? All towels will then be recycled as the set and costumes for The Musical. Contact [cecile@cecilewilliams.com.au](mailto:cecile@cecilewilliams.com.au)
- Pete Usher is leading a series of open public songwriting workshops. Four sessions x 2 hours and just \$50, as they are supported by Festivals Australia funding. It can be any song you have half written, or never written. Pete is a wonderful, warm and generous musician, singer and songwriter with 3 CD recordings to his credit with Perth's Pete Usher and the Global Pandemic. Fun and relaxed. Bookings through Denmark Arts.

### **NEWS FLASH**

- Dr Jim Underwood, marine biologist, has 'unearthed' a great solution to protecting Greens Pool. Its called a Fish Habitat Protected Area. Today, there was a group of Denmark locals invited to attend a meeting by the Department of Fisheries and we look forward to hearing more about this.
  - We are calling for dancers, movers, actors, backstage helpers, comedians, poets, young people and teenagers more than welcome. Contact [peter@peterkeelan.com.au](mailto:peter@peterkeelan.com.au) to become involved.
  - Big thanks to Melissa and all the artists at the Butter Factory, for their enthusiasm and action to produce Greens Pool The Visual. Thanks also to Chrissie Gregory for the idea to include visual artists who support protecting G Pools
  - big welcome to Dave Rastrick, Olly Watkins, Caroline Blumer, Barry Heydenrych as part of the Core Band
  - Gordon Harris's book about Greens Pool is now available in reasonable sized pdf 'slices' by going to [www.peterkeelan.com.au/GreensPool](http://www.peterkeelan.com.au/GreensPool)
- Our thanks to Gordon for his generosity to allow this free access to his book **Another Day In Paradise**.
- Thanks to Mike Hemmings and Simon Neville for the use of their photos.
